

Information of the procedure for obtaining QR codes

1st stage - passing PCR test

Foreign citizens must pass PCR-test in the laboratories of Moscow that connected to the Unified Medical Information and Analytical System of the city of Moscow (hereinafter - UMIAS). The full list of city, federal and private laboratories performing PCR studies on COVID-19 and connected to UMIAS is published on the portal <https://mosgorzdrav.ru/covid-test>

Before the PCR test, a medical worker at the laboratory will help a foreign citizen to fill out a questionnaire in which a foreign citizen must specify the surname, first name, patronymic (if any), his passport number, date of birth, telephone number of the Russian mobile operator, email and other personal data. The results of the PCR test will be sent by the laboratory to UMIAS and to the e-mail of a foreign citizen specified during the registration at the laboratory

2nd stage - obtaining a digital certificate (QR code)

After receiving a negative result of a PCR test on Covid-19 to the email address specified during registration at the laboratory, a foreign citizen must register on the portal immune.mos.ru. In the window, that opens <https://immune.mos.ru/foreign>

a foreign citizen must specify the surname, first name, patronymic (if any), date of birth, phone number of the Russian mobile operator (prefix +7 is automatically inserted without the possibility of deletion), passport series and number, (for regional tourists SNILS), work license number (if available, optional field).

Important! The information entered at the portal must completely coincide with the information that was indicated by a foreign citizen during the PCR test at the laboratory.

An SMS code will be sent to the specified phone number, which must be entered in the field that appears to identify a foreign citizen. After identification, a foreign citizen will receive a QR code, certifying a negative PCR test result, which can be printed on paper, saved to a smartphone as a file or saved as a screenshot. **Since December 8, 2021, the QR-code is valid for 48 hours.**

In the case when all the information is provided correctly and the data entered on the portal <https://immune.mos.ru/foreign> coincide with the data that was entered at the laboratory, the information with a QR code will appear. If the information was provided with errors or does not coincide with the information that was provided by a foreign citizen during the PCR test at the laboratory, the QR code will not be issued and an error message in Russian will appear.

If an error message is displayed, and the entered information completely coincides with the information that was indicated by a foreign citizen during the PCR test at the laboratory, the foreign citizen must contact the laboratory of the PCR test to verify the information.
